Domestic Milk Production

The cattle feeders perhaps more than any other class of farmers are interested in the results of the recent survey of the Alberta Milk Producers' Association. The survey shows that the average yield of a good cow is 10.5 gallons of milk per day. This is a very good yield, and it is a very good indication of the quality of the milk.

It is the duty of the farmer to produce the best milk possible. This can be done by feeding the cow the best feed available. The best feed is a combination of good hay and good grain. The hay should be of good quality and the grain should be of good quality. The farmer should also keep the cow clean and healthy.

We have the Hygienic Antiseptic Feeders, Bottles & Fitings, Bottle brushes etc.

We also have practically every good Infants Food in the market. If the food now being used does not agree perfectly with the baby, try one of the other good ones we can supply.

Farmers Elevators Increase
 When the government of the Province of Alberta passed the Bill for the increase of the rate of duty on grain, the farmers of the province were greatly benefited. The rate of duty was increased from 10 to 15 cents per bushel, and the farmers were able to sell their grain at a higher price than before.

The Value of Good Stationary

To much stress can not be laid upon the importance of sending out your correspondence in a manner that will create a good impression. Don't tire money by first attaching your expenditures for stationary. Get the best. The impression created by good business stationery is lasting, and many a house has lost business owing to the fact that letterheads, advertising, etc., were gotten up in such a manner as to leave the receiver under the impression that the concern sending out such matter was doing business in an office. Send your orders for well printed matter to this office.

Story of The War

The story of the war is a long and painful one. It is a story of suffering and death, of heroism and sacrifice. It is a story that will live in the hearts of all who have lived through it.

Victims of Bubble Blows

The victims of bubble blows are those who have been deceived by the promises of a false prosperity. They are those who have been led astray by the siren song of speculation and who have now found themselves in a state of ruin.

Additional Locals

Additional locals are those who have been affected by the war in some way. They are those who have lost their homes, their families, or their livelihoods. They are those who are in need of help and support.

the 1980s, the use of drugs in the sports world has become a major concern. In 1988, the World Anti-Doping Agency (WADA) was established to coordinate the fight against doping in sports. Since then, the agency has been instrumental in the development of the World Anti-Doping Code, which is the foundation of anti-doping efforts in sports. The code is a set of rules that governs the use of drugs in sports, and it is the responsibility of the International Olympic Committee (IOC) to enforce it. The IOC has been successful in its efforts to eliminate doping from sports, and it is expected that the code will continue to be a key tool in the fight against doping in the future.

Coe Palace Pharmacy, Limited

The Effect of the European War on Drug Prices
We want to assure our customers that no "War Prices" are being charged at our store. The usual fair prices which we have always offered still prevail. Jobbers from whom we buy report a falling off in the supply of some pharmaceutical chemicals and crude drugs which are procured only in Europe. Such conditions may cause a slight advance in the prices of some prescriptions. Should the war continue for a long time other things may be affected, but any advance in our prices will be reasonable and only to the amount of the increased price which we must pay.

Canada's Strength

TWO years or so of stringent times have washed out of the fabric of Canadian business some things that were marring the fair aspect of our prosperity—speculation in real estate, excessive personal extravagance, venturesomeness in finance and a tendency to imprudent business expansion. To-day Canada's strength is showing itself unmistakably. We have recovered our self-confidence and courage.

Your business men who advertise own it to themselves and the time to continue their advertising. Advertisements are declarations of purpose, courage and service. An absence of advertisement is an indication of ineffectiveness, and of energy in a state of collapse or suspension.

Strength shows itself in action—in advertising.

A very enjoyable concert and social meal place in the Kyanston Hall on Wednesday evening, when Dustin showed that he was not in the habit of being out of Atlanta in the hope of it being a free one, could not help wondering when all the people come from. The show was taken by Mr. W. S. Emory.

The program shown, "The Magic of the Movies," was a very interesting one, and the audience was very much interested in the same.

To the Farmers of Stettler District

DON'T SELL OFF YOUR BREEDING STOCK

Tight money and war prices for grain have induced many farmers all over North America to sell off their livestock, and the flood of offerings has temporarily forced down prices of all stock.

Influenced by these lower stock prices, farmers say it won't pay to feed stock, and unselected animals are being rushed to market in great quantities and sold at sacrifice prices.

PRUDENT LOW PRICES FOR STOCK CANNOT LAST LONG

The war is certain to cause a great depletion of stock on the European Continent, and from that source is the foundation of the war a great demand for breeding stock must arise.

The destruction from the East and Russia of stock now lying in the United States must be taken into account. It is the duty of the farmer to keep his stock as long as possible, and to sell only when the market is at its peak.

BREEDING STOCK IS SHORT ALL OVER THE WORLD

and the farmer who gets rid of his stock now will have to pay heavily to get started again.

On the other hand, when the war is over and grain prices again become normal, low stock prices will be paid, and farmers who held their breeding stock will reap a rich reward.

The marketing of unselected stock is to be deprecated, since it brings a considerably low price. If, then, even with high prices, grain should be low, it is not when stock prices are low, and it is not when stock prices are low, and it is not when stock prices are low.

SHEEP THE BEST WEED KILLERS

Large areas of the district are covered by sheep, and this is a great help in keeping the weeds down. A few lines of sheep will do more for you than any other kind of weed killer.

They give a double return, namely, meat and wool. They are easy to feed and easy to handle.

They are also very valuable in the destruction of weeds and insects.

By the method of a flock helps the good breeding stock to flourish.

DON'T PUT ALL YOUR EGGS IN ONE BASKET

My Agricultural country was entirely covered, except by the war, and the war is now over.

The growth of sheep and stock is a great help in keeping the weeds down. A few lines of sheep will do more for you than any other kind of weed killer.

They give a double return, namely, meat and wool. They are easy to feed and easy to handle.

To the Farmers of Stettler District

DON'T SELL OFF YOUR BREEDING STOCK

Tight money and war prices for grain have induced many farmers all over North America to sell off their livestock, and the flood of offerings has temporarily forced down prices of all stock.

Influenced by these lower stock prices, farmers say it won't pay to feed stock, and unfinished animals are being rushed to market in great quantities and sold at sacrifice prices.

PRESENT LOW PRICES FOR STOCK CANNOT LAST LONG

The war is certain to cause a great depletion of stock on the European Continent, and from that source at the termination of the war a great demand for breeding stock must arise.

The destruction from the Foot and Mouth Disease now raging in the United States must be enormous.

It is a fact that the Canadian people are not buying enough of their own goods. It is a fact that the Canadian people are not buying enough of their own goods. It is a fact that the Canadian people are not buying enough of their own goods.

BREEDING STOCK IS SHORT ALL OVER THE WORLD

and the farmer who gets rid of his stock now will have to pay heavily to get started again.

On the other hand, when the war is over and grain prices again become normal, live stock prices will be good, and FARMERS WHO HOLD THEIR BREEDING STOCK WILL REAP A RICH REWARD

The marketing of unfinished stock is to be deplored, since it brings a wretchedly low price. If, even with high grain prices, there should be no loss when stock prices recover as they are certain to do when the rush of deliveries ceases. This must happen before long.

SHEEP THE BEST WEED KILLERS

Large areas of this district are developed to sheep raising, and the time is opportune for adapting this industry. Sheep are prolific. A lamb flock that does not yield one hundred per cent is a poor one.

They give a double return, namely, meat and wool. They are economical to feed and easy to handle. And they largely pay for themselves in destruction to weeds and insecticides.

Buy the nucleus of a flock before the good breeding stock is depleted.

DON'T PUT ALL YOUR EGGS IN ONE BASKET

No Agricultural country ever enjoyed continued prosperity with out raising live stock.

The result of abandoning stock raising because of temporarily high grain prices will be disastrous in the long run. When most farmers all over America are rushing into grain raising, the wise farmer will have a year or two ahead.

To the Farmers of Stettler District

DON'T SELL OFF YOUR BREEDING STOCK

Tight money and war prices for grain have induced many farmers all over North America to sell off their livestock, and the flood of offerings has temporarily forced down prices of all stock.

Influenced by these lower stock prices, farmers say it won't pay to feed stock, and unfurnished animals are being rushed to market in great quantities and sold at sacrifice prices.

PRESENT LOW PRICES FOR STOCK CANNOT LAST LONG

The war is certain to cause a great depletion of stock on the European Continent, and from that source at the termination of the war a great demand for breeding stock must arise.

U. F. A. NOTICES AND PROGRAMME, 1915, STETTLER UNION 89

WHAT IS THE USE OF THE U. F. A.

The answer to that is just what it is that it has done and what it is doing and what it will do.

The whole thing... is based on the principle that "UNITY IS STRENGTH". We farmers having a like occupation like to unite to secure the highest benefit, and it is according to the degree to which we unite, so will our strength be and our power to gain these benefits.

Under where we are, what we are. We hold the strongest position in the State we as workers on the farm, represent both "capital and labor", we own the "means of wealth" we produce the most vital products for the life of the nation and yet we are the poorest body of men in the State.

THERE IS A REASON, and it is because we are not UNITED, as we are detached, scattered and isolated in our efforts, we are weak and powerless, when we group the real meaning of "UNITY AND STRENGTH" we shall be strong and prosperous, and hold a better life will be for us.

There are probably only twenty-five of the farmers of the province who are members of the "U. F. A." and what has been done since the time of what we have done if all the farmers were to join the "U. F. A."

WE ARE WORKING FOR THE COMMERCIAL-EDUCATIONAL AND SOCIAL BENEFITS

EDUCATIONAL is to get full value for what we sell and give a reasonable price for what we buy.

EDUCATIONAL has to be better farmers to produce more and better.

SOCIAL is to make the farm the best place to live.

Let every member feel that the responsibility rests with him to make the "U. F. A." a success.

PAY YOUR SUBSCRIPTION OF ONE DOLLAR half of it goes to the central office, the other half to meet the expenses of the Local Union.

MAKE AN EFFORT TO ATTEND THE MEETINGS and let every member feel that he can give these full and free expression to his best ideas and opinions.

In any commercial deal let every member understand that it is his duty to support it.

PROGRAMME

An address will be given on the various subjects on the programme to be followed by a general discussion and debate in which all members are expected to take part.

Too much stress can not be laid upon the importance of sending out your correspondence in a manner that will create a good impression. Don't save money by first attacking your expenditures for stationery. Get the best. THE VALUE OF GOOD STATIONERY

Too much stress can not be laid upon the importance of sending out your correspondence in a manner that will create a good impression. Don't save money by first attacking your expenditures for stationery. Get the best. The impression created by good business stationery is lasting, and many a trade has been won owing to the fact that letterheads, advertising, etc., were gotten up in such a manner as to leave the receiver under the impression that this concern sending out such matter was doing business in an A-1 way. Send your orders for well printed matter to this office.

PATRIOTISM IN PRODUCTION

Pin Your Faith to Live Stock

The outstanding feature of the world's farming is that there will soon be a great shortage of most supplies. Here your breeding stock. They are today Canada's most valuable asset. If you sacrifice your breeding stock, you will regret it in the near future. It is to insure your live stock, Europe and the United States, as well as Canada, will pay higher prices for beef, mutton and hogs, in the very near future. Remember that live stock is the only true source of economic and profitable farming. The more grain you grow, the more stock you can carry. The more stock you carry, the more profitable your farm. Invest in live stock, and you will be successful.

AN EXPENSE?
Some men are deterred from taking out a policy because they say they "cannot afford the expense."
Why should a man look upon a life insurance premium as an expense?
He would not think of referring to the money he might deposit in a savings bank as an expense.
As a matter of fact, the money invested in a life insurance policy in the Confederation Life Association, is money saved—merely put in an absolutely safe investment, and is bound to come back some day to a man's family or to himself.
Therefore it should not be looked on as an expense, but as a wise and judicious investment.
A policy in the Confederation Life Association, besides being a good investment, furnishes immediate and certain insurance protection for a wife and family.
Compared with the benefits secured, the sum which is necessary to deposit each year in order to secure the benefits of a policy in the Confederation Life, is a small one.

**THE PRICE YOU
PAY FOR DRUGS**

The Value of Drugs or of a Prescription
is Not in the Price You Pay—
IT'S IN THE GOOD THEY DO

If you pay higher prices than we ask
you pay too much — if you pay less
than our prices you will get inferior
quality.

**"QUALITY IS THE TRUE TEST
OF CHEAPNESS"**

Compare our prices with those retail elsewhere and
convincingly note comparative qualities of goods.

Best quality at lowest cost is a rare combination, but
that is what you get at our store.

Quality is remembered long after the price is forgotten.

Closing Date Announced In Next Issue

The standing this week shows considerable change. Mrs. Trimble of Exeter, after some weeks of hard rivalry with several others has at last succeeded in getting first place, while Miss Armstrong holds 2nd. In Stettler Mrs. Morland and J. A. McArthur are holding their own. Miss Gladys Adams, Miss Margaret Driscoll and Miss Finlayson are running well, and will be heard from again. As the show votes from Big Valley did not arrive in time this week, there is not much change as usual in the standing of Big Valley candidates.

The last record this week has been made by Mrs. Trimble of Exeter, who in the Big Valley list, Mrs. Trimble has a strong support in the Stettler and Bantry districts, and will make rapid gains from now on.

We predict for next week's issue more change than in the standing. As the subscription votes stop at the end of the month, most of the candidates have been holding their subscriptions to until next Tuesday, and these will change the standing to a degree not expected by the general public. We will give a box of Liggett's cigarettes to the person who makes the greatest gain in total so that next week will be an interesting contest number.

It is unnecessary to speak of the importance of the last three or four days of November in reference to votes? For each yearly subscription a candidate gets to know whether there is a home of 100 votes over each obtained in the past.

AN EXPENSE

Some men are deterred from taking out a policy because they...

...think they "cannot afford the expense."

Why should a man look upon a life insurance premium as an expense?

He would not think of referring to the money he might deposit in a savings bank as an expense.

As a matter of fact, the money invested in a life insurance policy by the Confederation Life Association, is money saved—merely put by him absolutely safe investment, and is bound to come back some day to a man's family or to himself.

Therefore it should not be looked on as an expense, but as a wise and judicious investment.

A policy in the Confederation Life Association, besides being a good investment, furnishes immediate and certain insurance protection for a wife and family.

Compared with the benefits secured, the sum which is necessary to deposit each year in order to secure the benefits of a policy in the Confederation Life, is a small one.

Sleeplessness is one of the chief causes of ill-health. Sleeplessness is the cause of nervousness, irritability and the many ailments. The health of these organs

is Assured by
Beecham's Pills. A luxurious vegetable remedy, which acts immediately on the bowels, and restores the system to its normal condition, giving them a free working action. It relieves of painful sleep and loss and keeps the bowels, in all the commonest symptoms, free from trouble.

Dodge Bros. MOTOR CAR

THE DODGE BROTHERS MOTOR CAR has many features that are unusual in a car of so moderate a price, and represents a combination of refinement, efficiency and equipment that is of more than ordinary interest to the intending purchaser.

There has been no effort to produce a car that would sell at a low price, but there has been a genuine interest in building a car in which the material, the design and the manufacturing practice would represent the highest quality at a moderate cost to the purchaser.

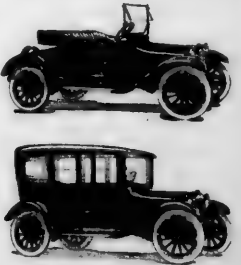

Dodge Brothers have brought to bear upon the accomplishment of this purpose an extraordinary experience, immense production capacity, and complete financial independence.

In their first year Dodge Brothers manufactured and marketed a volume of cars which ranked them among the first four producers in the world.

The wheels of the car hold fast to the road, but do you know why? Light, strong road parts and scientific distribution of weight hold the weight down to 2,200 pounds, and produce a perfectly balanced car. Lightness and balance result in roadability—and also in low gasoline consumption and high the mileage.

The Motor is 30-35 horsepower—The gasoline consumption is unusually low—The tire mileage is unusually high.

The heavy sentences melted at little-meaders in this province during the last three or four weeks inasmuch that no province will come out of the pest of lifting cattle. Such has been the common disease here. Previous to this, the province will not mitigate the sentence of, as the case in Sittler's last year, alone.

Maxwell

"The Wonder Car"

Men who have driven other makes of cars for years—Men who have experimented—Men who have been "stung"—now drive Maxwells.

Right in this town—and all over the country—are men and women who have been driving different makes of cars for years, who now drive and own by their Maxwells.

Each year they used to buy a different make, until they found that the Maxwell was the car which would and then easily.

When the 1915 Maxwell "Wonder Car" comes in, it will be the new low price of 1916, you can see it in the Maxwell car which has been driving it.

They didn't take our word or anybody's word for it—they looked into it themselves.

They found that the Maxwell is a handsome, general, easy-riding car. They compared it with cars that are sold at double the Maxwell's price.

They found that the Maxwell cost them very little more than the other cars, and that it was the only car that would and then easily.

The Harmony Minstrels (Stettler's) gave a splendid performance at the Opera House last evening. The show was packed from floor to ceiling and every eye was satisfied with the number in which the show was conducted. It would be right to congratulate the Harmony Minstrels on their performance.

THE LATEST

The latest range of ranges is now on sale. The great "FACE" is
 only the only thing in the world, it is the only thing in the world of the
 other, which is in the world.

RANGES

Of all ranges the **FACE** is the most popular, and it is the only one
 that offers the greatest value for the money. It is the only one that
 is so simple, so easy to use, and so reliable. It is the only one that
 is so cheap, so good, and so beautiful. It is the only one that
 is so perfect, so complete, and so perfect.

Western nations to preserve the sea-lanes, and submarines must move vigorously around England and in the Mediterranean. The Allies now need to put their ships to augment their grand fleet, but the increase in size and cruising range of submarines has impaired the arm necessary for patrol work, and these light crafters are taken away from here and used in European waters to great advantage.

Not that the Allies fear the ability of the Germans to get any ships to sea by their removal of ruthless submarine warfare. The Germans have tried their utmost, despite their pretensions in their answer to our Sumner note, to torpedo the two largest ships still in merchant service between New York and England, the Baltic and the Adriatic, and for a year they failed. The chances of their getting such

boats under the new conditions are not much greater than they have been before," an English captain said. "Twenty-five per cent of the ground threat is pure bluff, and the other twenty-five per cent will possibly diminish into futility." And that is probably true. For once all movement is allowed to arms themselves, the submarine war becomes much less effective. So far the chief obstacle to

the raising of certain vessels has been the attitude of the United States; that ships armed in any way except defensively would be considered vessels of war and could not trade with our ports. With this restriction re-
